

Ready. Mix. Go.

Reduce processing time and cost.
Enhance glossiness and swallowability.

Eudragit®

IR ReadyMix White

Optimize the processability, performance and preference of your oral dosage forms with immediate release profiles

EUDRAGIT® IR ReadyMix White is a new ready-to-use powder blend of our fast-dissolving immediate release coating EUDRAGIT® E PO, which has been trusted by pharmaceutical companies worldwide to enhance the functionality of their oral dosage forms for many years.

Fast and easy to process to boost productivity and reduce risk

Our high throughput solution can be efficiently and consistently sprayed as films at a high solid content with standard manufacturing equipment.

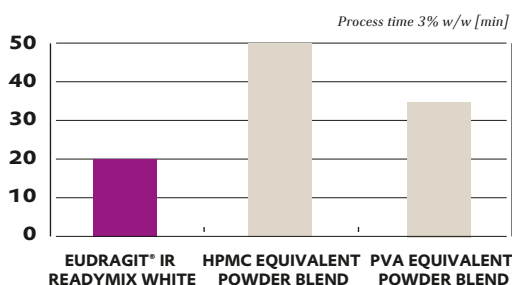

Compared to equivalent PVA and HPMC powder blends, processing times can be reduced by 40 to 60%, while average process temperatures can be reduced by between 5° and 10°C. It is also easy to clean using normal or slightly acidic detergents.

Superior swallowability plus an elegant, high-gloss appearance

The film formed from the pure white powder enables superior swallowability, with a smooth, high-gloss coating enhancing the optical elegance of tablets and other dosage forms. In addition to enhancing your brand, rates of therapy adherence can also be boosted across patient populations including children and the elderly.

Process time comparison

The manufacturing process and components of EUDRAGIT® IR ReadyMix White comply with the requirements of all major pharmacopoeias.
