TEGO® Flow 433

A Cost-effective, Universal Surface Control Additive for Flow, Leveling and Defect Control

Universal Flow & Leveling – TEGO® Flow 433

TEGO® Flow 433 delivers reliable flow and leveling at a cost-effective price point in all types of coatings. TEGO® Flow 433 is a highly compatible, 100 % active siloxane that prevents defects and maintains good defoamer performance.

Key properties:

- Cost-effective
- Universal
- 100 % active liquid

Benefits of TEGO® Flow 433

- Reliable leveling, wetting, and anti-crater performance
- Efficient
- High clarity due to excellent system compatibility
- Recoatable
- Maintains defoamer efficacy

EVONIK
Leading Beyond Chemistry

2026-11

TEGO® Flow 433 has been designed to provide flow and leveling and defect control with little or no detrimental side effects. Proprietary organic modification was utilized to create the desired performance properties.
TEGO® Flow 433 is a cost-effective member of Evonik's surface control additive range.

TEGO® Flow 433 leverages the strong utility of siloxanes with a unique modification to obtain strong defect control while maintaining defoamer efficacy. The high compatibility allows formulators to create high clarity clearcoats and high gloss pigmented systems.

Reliable Performance at a Cost-effective Price

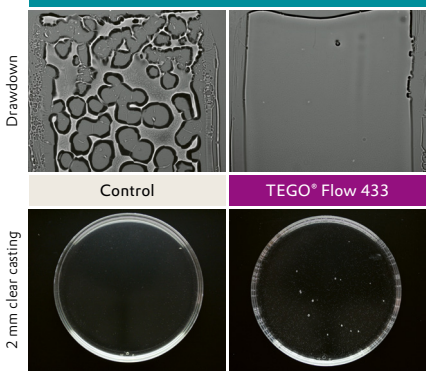

TEGO® Flow 433 provides reliable, universal performance

- Good leveling, reduced orange peel
- Effective wetting
- Good defect control
- High clarity
- Recoatable, with minimal impact on slip
- Maintains defoamer compatibility
- Easy-to-use, 100 % active, low-viscosity liquid

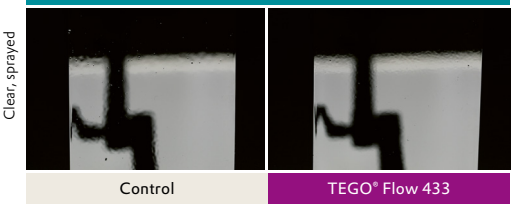

Product Performance in Various Systems

Wetting and Defect Control
(100 % 2k Epoxy)

TEGO® Flow 433 provides reliable, universal performance throughout most coating types, including waterborne, solventborne, and 100 % solids formulations.

Leveling and DOI
