

Coating Additives Products

Information on KKDİK (Turkey REACH)

On June 23rd, 2017 the Ministry of Environment and Urbanization (MoEU) of Turkey published its KKDİK regulation¹ which is very similar to EU REACH regulation, aiming to regulate the safe use of chemicals in the Turkey market to ensure sound protection for human health and the environment.

According to this regulation, all existing chemical substances manufactured or imported ≥ 1 ton/a would have to be registered by December 31st, 2023.

On December 23rd, 2023 the Turkey's Ministry (MoEUCC) has published the Regulation² Amending the KKDİK Regulation from 2017.

The amendment postpones the registration deadlines for substances manufactured in or imported into Turkey as follows:

31.12.2026	Substances at $\geq 1\ 000$ t/a Substances classified as Aquatic Acute 1 and Aquatic Chronic 1 (H400, H410) at ≥ 100 t/a CMR substances (Category 1A and 1B) at ≥ 1 t/a
31.12.2028	Substances at 100 – 1 000 t/a
31.12.2030	Substances at 1 – 100 t/a

For the Coating Additives business line of Evonik Operations GmbH we have appointed an Only Representative (OR) in Turkey in order to ensure supply and compliance under KKDİK and SEA³ of our products manufactured outside Turkey. The KKDİK pre-registration & SEA notification of the relevant substances contained in our products that are marketed in Turkey in quantities of at least 1 ton per year are completed via our commissioned OR in Turkey.

In addition, it is intended to register these substances within the appropriate registration deadline in accordance with our business decision.

For the information about KKDIK status of individual product please refer to the Regulatory Data Sheet (RDS). You will find them in the [COATINO®](#) for download.

Please feel free to contact us in case you need more information or assistance:
