

## Product Information

# Metalyst® MC 911

## Activated Nickel Foam Catalyst

### PRODUCT DESCRIPTION

Metalyst® MC 9 series are Evonik's innovative catalyst solution for hydrogenations in gas and liquid phase fixed bed processes. These activated Nickel catalysts come in a unique foam shape that offers very high activity - due to its open structure - and light weight (low bulk density) at remarkable mechanical strength.

#### Typical Properties

Property	Unit	Value
Appearance		Black, uniform shaped, porous cuboids under water
pH Value		≤10.5
Product Dimensions		4*4*1.9 mm

The data represents typical values (no product specification)

### TYPICAL APPLICATIONS

Fixed bed processes in gas and liquid phase, like:

- Hydrogenation of Olefins to Alkanes
- Hydrogenation of Butynediol to Butanediol
- Hydrogenation of Nitriles to the corresponding Amines
- Hydrogenation of Carbonyl Groups to the corresponding Alcohols

#### Product Composition

Product Composition	Unit	Value
Nickel (Ni) Content	%	≥85

The data represents typical values (no product specification)

### BENEFITS & ADVANTAGES

- Non-pyrophoric - easy handling
- Mechanically stable, regularly shaped catalyst particles
- Low bulk density: substantially less metal required
- Low pressure drop in catalyst bed
- Increased activity due to highly porous structure
- High selectivity - significantly reduced by-products

### PACKAGING

- Metalyst™ MC 911 is delivered as a bulk material under water in 212 liter steel drums with inner epoxy coating (60 kg catalyst)
- Special packaging is available upon request

### STORAGE

Drums should be protected from freezing, not exposed to direct sunlight and stored in a dry place between 5 and 30°C (40 to 83°F).

### SHELF LIFE

Best before 24 month after manufacturing

#### Disclaimer

This information and all further technical advice are based on our present knowledge and experience. However, it implies no liability or other legal responsibility on our part, including with regard to existing third-party intellectual property rights, especially patent rights. In particular, no warranty, whether express or implied, or guarantee of product properties in the legal sense is intended or implied. We reserve the right to make any changes according to technological progress or further developments. The customer is not released from the obligation to conduct careful inspection and testing of incoming goods. Performance of the product described herein should be verified by testing, which should be carried out only by qualified experts in the sole responsibility of a customer. Reference to trade names used by other companies is neither a recommendation, nor does it imply that similar products could not be used.
