

Product Information

ZEOFREE® 5133

CAS NUMBER

1344-95-2

PRODUCT DESCRIPTION

ZEOFREE® 5133 is an hydrophilic precipitated milled Calcium Silicate.

It provides low dusting, anti-caking and free-flow properties for a broad variety of products and processes. It is particularly effective in promoting flow in process, preventing buildup on spray drier walls and in finished products such as salt and non-dairy creamers.

Typical Properties

Property	Unit	Value
Bulk Density	kg/m ³	200
Chemical Name		Calcium Silicate
Linseed Oil Absorption	ml/100 g	130
Loss on Drying 2 h at 105°C following ISO 787-2	%	≤6
Particle Size d 50, laser diffraction following ISO 13320	µm	11
pH Value 5% in Water following ISO 787-9		10

The data represents typical values (no product specification)

TYPICAL APPLICATIONS

Food, feed

SAFETY

Information concerning the safety of this product is listed in the corresponding Safety Data Sheet, which will be sent with the first delivery or upon updating. Such information is also available from Evonik Operations, Product Safety Department, E-MAIL sdsim@evonik.com We recommend

to read carefully the safety data sheet prior to the use of our product.

PACKAGING

For details regarding our packaging options for this product, please contact your local sales representative.

STORAGE

Our silica products are inert and extremely stable chemically. However, due to their high specific surface area, they can absorb moisture and volatile organic compounds from the surrounding atmosphere. We therefore recommend storing the products in their original packaging (e.g. fully shrink-wrapped) or in sealed containers in a dry place away (or apart) from volatile organic substances. Even if a product is stored under these conditions, after a longer period it can still pick up ambient moisture over time, which could lead to its exceeding the specified moisture content. For this reason, our recommended use-by date is 36 months after date of manufacture. Product more than 36 months old should be tested for moisture content before use in order to make certain that it is still suitable for the intended application.
